

Videnskabelige, danske, engelske og tyske

Navne på alverdens fugle

IOC List by Gill, F, D. Donsker and P. Rasmussen (Eds). 2022
tilføjet danske og tyske navne af NAVNEGRUPPEN
for

Dansk Ornitologisk Forening

ved

Mogens Behnke-Pedersen - Svend Rønne - J. Møller Hansen - Jon Fjeldså

De danske navne er stillet i forslag og kan derfor ændres, hvis der er vægtige grunde herfor.

Navnegruppen har efter bedste evne sat sig for at give de bedste navne.

I nogle tilfælde er bedste evne ikke godt nok, og navnet kan

af mere eller mindre indlysende grunde være uheldigt eller forkert.

I så fald vil gruppen meget gerne høre om det og vil efterfølgende tage stilling til navngivningen.

Kommentér på Navnegruppens e-mailadresse. Navnegruppen@dof.dk

For at forenkle søgningen, benyttes bindestreger primært i forbindelse med todelte stednavne,
for eks. Costa Rica-krattinamu, São Tomé-harlekinvagtlet og Sri Lanka-buskvagtlet o.s.v.

2 udgave - 1. september 2022

De officielle tyske artsnavne er med tak lånt fra

Die Vögel der Erde

Arten, Unterarten, Verbreitung und deutsche Namen

Peter H. Barthel, Christine Barthel, Einhard Bzzel, Pascal Eckhoff,

Renate van den Elzen, Christoph Hinkelmann & Franl D. Steinheimer

Deutsche Ornithologen-Gesellschaft - Radolfzell 2021

De tyske navne på underarter i grå tekst er tilføjet fra andre kilder

Samt fra navne på papegøjer fra

Deutsche Namen der Papageien

Akademie für Vogelhaltung, Berlin 2022

Spruce Grouse and Siberian Grouse do not form a monophyletic clade in recent phylogenetic analyses, but rather Siberian Grouse is a basal taxon within a clade that includes Spruce Grouse, *Tetrao* and *Lyrurus* (Kimball et al. 2011; Persons et al. 2016; Kimball et al. 2021). Recognize the resurrected genus *Canachites* as distinct from *Falcipectnis* (AOS 2021).

Replaces *T. u. major* (Dickinson & Rensen 2013). Includes *radolphi* (Madge & McGowan 2002).

Tetrao urogalloides Middendorff, 1853 has precedence over *Tetrao parvirostris* Bonaparte, 1856 (H&M 4:47).

May not be distinct from nominate on mtDNA (Corrales et al. 2014), but female plumages distinct (Cramp & Simmons 1980).

Subspecies *viridanus* may not be distinct from nominate based on mtDNA (Corrales et al. 2014). Variation clinal (Cramp & Simmons 1980). Includes *tschusii* (Dickinson & Rensen 2013). Subspecies status unsettled (Corrales et al. 2014).

										Ecuadorian Hermit <i>Phaethornis baroni</i> was treated as conspecific with Long-billed Hermit <i>P. longirostris</i> following SACC (136). Restoration of species status deserves reconsideration given morphological distinctions, vocal differences (not documented), allopatric range, and advances in the taxonomy of this species complex (Ridgely & Greenfield 2001; HBW). A phylogeny of these hermits would be welcome.

6845										Until recently, the genera of cormorants and the distinctions between "shags" and "cormorants" have remained mostly unresolved due to conflicts among studies and missing taxa (Siegel-Causey 1988; Kennedy et al. 2000; Christidis & Boles 2008). We follow the comprehensive phylogenetic studies of Kennedy & Spencer (2014) and Kennedy et al. (2019) in resequencing this family. Generic revisions were accepted for the North American species by NACC (Chesser et al. 2021) but narrowly declined by SACC (Proposal 648).

7958	<i>Buteo oreophilus</i>	<i>Buteo oreophilus</i>	Bjergvåge	Mountain Buzzard	Bergbussard	Hartert, E & Neumann, 1914	AF : Ethiopia to n Malawi			Archer's Buzzard is split from Augur Buzzard (Riesing et al. 2003; HBW 2; cf. Clark 2003) but possibly a rufous morph of Augur Buzzard <i>B. archeri</i> . Often regarded as conspecific with <i>B. augur</i> , but appears not related to the <i>B. augur</i> / <i>B. rufofuscus</i> clade; is basal to the clade that includes most of the African buteos (Riesing et al. 2003). Genetic data require confirmation (Clark comment).

8767										The Cuckoo-roller is the only member of an ancient lineage with no known relatives among modern birds and thus put into a separate Order, Leptosomiformes, distantly related to mousebirds and trogons among other Core Landbirds (Hackett et al. 2008; Prum et al. 2015).
8768	ORDER LEPTOSOMIFORMES	ORDER LEPTOSOMIFORMES							PHY	The correct spelling of this family name is Leptosomidae, not Leptosomatidae (Bock 1994). Change English name of Cuckoo Roller to Cuckoo-roller to comply with the IOC-WBL established rules for English name construction. <i>Leptosomus</i> is not a "roller" but is only distantly related.
